## Neptronic Welcomes Northeast HVAC Solutions – New Agent in New York

**Montreal, Canada | July 26, 2018** – Neptronic is delighted to announce the recent addition of Northeast HVAC Solutions to the Neptronic family, as the new agent for the Upstate New York corridor market. We are looking forward to fostering a lasting and mutually successful relationship with Northeast HVAC and to benefiting from their 80 years in the business.

***“We are very excited about representing Neptronic -- the technology, the products and the people are what makes Neptronic an industry leader. We are grateful for this mutually beneficial partnership.”***

**Donald F. Ferguson, President  
Northeast HVAC Solutions, Inc.**

Founded in 1938 by Mr. Franklin R. Foote, the F.R. Foote Co., Inc. became Northeast HVAC Solutions in 2009 to better represent their continued expansion and diversification.

Representing such pillars in the industry as Loren Cook and Marley Cooling Tower Co., Northeast HVAC Solutions, Inc. continues to grow. The 2014 acquisition of Alla Company doubled its then-size and the steadfast partnerships with the Marley line and manufacturers such as Armstrong Fluid Technologies granted representation of the entire Central New York region.

As of January 1<sup>st</sup>, 2018 Northeast HVAC Solutions, Inc. and Slater Equipment Company merged under the name Northeast HVAC Solutions, Inc. This merger of two strong, highly compatible companies allows for better services, increased product offerings, and enhanced support to the company's valuable customers.

## About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft<sup>2</sup> (7,500 m<sup>2</sup>) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 75% of its sales through an exclusive distribution network for the HVAC industry worldwide
