# Another Win for SKD MEET 2014 Innovation Award

**Montreal, Canada | May 7, 2014** – Neptronic is the 2014 recipient of the MEET 2014 Innovation Award in the “ASHRAE – NB/PEI Chapter” category for the new SKD Direct Steam Injection Humidifier featuring X-Stream™ technology.

Selected by a panel of ASHRAE judges, Neptronic was selected as a winner at the MEET (Mechanical Electrical Electronic Technology) Show in Moncton from May 7-8, 2014. This biennial event attracts exhibitors and visitors from all over Canada and the US, displaying the very latest equipment available to the mechanical and electrical industries. MEET is the second largest event for the industry in Canada.

This award is in addition to the prestigious AHR Expo Innovation Award in the IAQ (Indoor Air Quality) category for the same product received on January 22, 2014, during the world’s largest HVACR exposition and conference in New York City.

By integrating high-efficiency components with patent pending condensate recuperation design and an advanced controller featuring factory-developed application specific software, the SKD reduces wasted energy by 85%, provides drain-free operation, and prevents condensate ejection while offering time-saving installation and troubleshooting features.

“We live in an era where energy consumption, clean air and time have become priority. I’m very proud of this award as it is a reflection of the dedication of our R&D team to combine multiple

innovative solutions to make the only automated and most efficient direct steam injection humidifier in the world” says Zev Kopel, President of Neptronic.

The SKD humidifier system includes a factory configured electronic steam controller for managing operating sequences, a re-evaporator, and features X-Stream™ technology which combines double wall stainless steel steam distributor system with encapsulated Armacell UT/Solaflex™ foam insulation and patent-pending engineered eyelets.

### **About Neptronic:**

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 250 dedicated employees in an 80,000 ft<sup>2</sup> (7,500 m<sup>2</sup>) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
