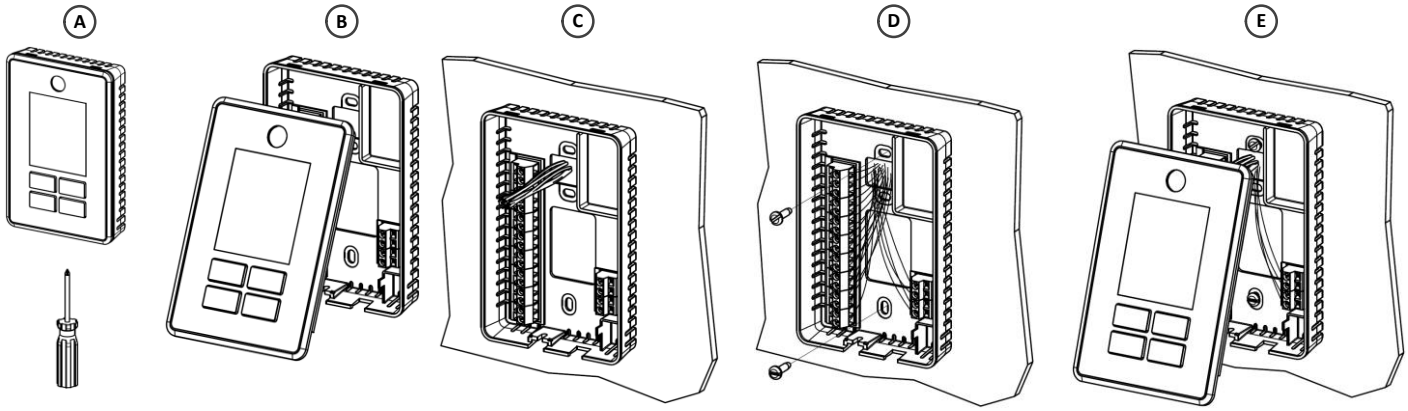
Mounting Instructions

CAUTION: Remove power to avoid a risk of malfunction.

A. Remove the captive screw that's holding the base and the front cover of the unit together.
B. Lift the front cover of the unit to separate it from the base.
C. Pull all wires through the holes in the base.
D. Secure the base to the wall using wall anchors and screws (supplied). Make the appropriate connections.
E. Mount the control module on the base and secure using the screw.



Do not use the supplied screws to mount the unit to an electric box or an equivalent device. The supplied screws are only suitable for mounting the unit to the wall. Ensure to use the appropriate screws for any other application. Tighten by hand only and ensure not to overtighten the screws.

Programming Mode

The Mode Selector jumper JP1 must be set to the PGM position (Programming Mode). Refer to the Wiring section on page 3. To exit, set the jumper back to the RUN position (Operation Mode). Advance to the next or return to the previous setting in order to save a changed value.

Range:	0ºC to 50ºC	[32ºF to 122ºF]
Offset:	Max. ± 5ºC	[± 9ºF]
Increment:	0.1ºC	[0.2ºF]

Compare the displayed temperature reading with a known value from a thermometer or other temperature sensing device. To offset or calibrate the sensor, use the arrow buttons to set the desired temperature reading. This is useful for controllers installed in areas where the temperature read is slightly different than the room's actual temperature. For example, a controller placed right under the air diffuser.

2. "USER SETPNT MINIMUM"

Default:	15ºC	[59ºF]
Range:	10ºC to 40ºC	[50ºF to 104ºF]
Increment:	0.5ºC	[1.0ºF]

In Operation mode, you cannot decrease the setpoint to less than the value set as the minimum user point. The minimum value is restricted by the maximum value set at Step 3, "User Setpnt Maximum". In other words, the value that is set as the minimum cannot be greater than the maximum value.

3. "USER SETPNT MAXIMUM"

Increment:	0.5ºC	[1.0ºF]

Set the desired temperature setpoint within the defined range. If the setpoint option was locked at Step 4, "User Setpnt locked", a lock symbol 🔒 is displayed. The setpoint value is restricted by the minimum at Step 2, "User Setpnt Minimum" and maximum at Step 3, "User Setpnt Maximum" values. In other words, the setpoint should be within the minimum and maximum setpoint range.
