

Space Distribution Unit (SDU4)

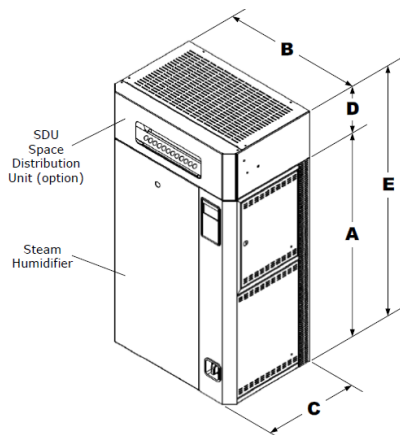

The space distribution unit is an ideal solution to humidify the air where there is no duct system. The SDU can be factory installed on top of the humidifier, remotely in space or ordered for field remote installation.

The SDU4 is available for the SKE4 models with a capacity of 6 to 90 lbs/hr.

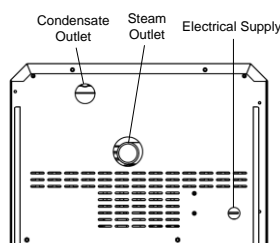

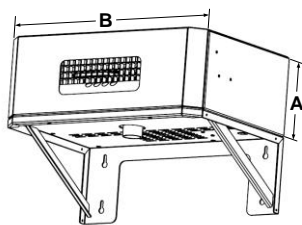

The SDU4 can be mounted onto the SKE4 and is completely factory assembled, with no field wiring between these two components required or it can be field installed on an existing compatible model.

Features

- Quiet steam distribution
- Ideal solution where there is no duct system
- Powered and controlled by the humidifier
- Air pressure switch included
- Can be remotely mounted
