Neptronic at MEET 2016 with Global Mechanical Systems

One of the Industry's Most Successful Show

Montreal, Canada | May 26, 2016 – Neptronic was pleased to be part of the 2016 MEET SHOW on May 18 and 19 at the Moncton Coliseum Complex. Bringing together mechanical and electrical manufacturers from across Canada and the US, the MEET is the second largest HVAC trade show in Canada. Again this year, the show had an impressive success, as it attracted over 6400 industry professionals and over 400 exhibitors. We had the opportunity to exhibit with our agent Global Mechanical Systems Ltd and showcase our new products to contractors, end-users as well as consultant engineers.

Our products received great deal of attention and we are very satisfied with the outcome of the show. We look forward to partaking in the 2018 edition of the MEET SHOW.

About Neptronic:

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft2 (7,500 m2) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software, firmware and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing and production.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 70% of its sales through an exclusive distribution network for the HVAC industry worldwide.
