Tridium Niagara Summit 2018

Last month, Neptronic had the privilege of attending Tridium's Niagara Summit 2018: *Connecting the World* which took place in New Orleans. Through forums, presentations and breakout sessions, participants benefitted from the 3 day event where developers, programmers, building engineers, end users and executives had the opportunity to share innovations, discuss industry trends and gain knowledge of the Niagara Framework[®].

It was a great experience and we look forward to participating in Tridium's next summit!

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 75% of its sales through an exclusive distribution network for the HVAC industry worldwide.
