Neptronic Welcomes New Agent in Baltimore

Montreal, Canada | January 10th, 2020 – We are pleased to announce that Ward-Boland Associates has officially joined Neptronic's global distribution network as an agent in the Baltimore area.

WBA is a premier HVAC product and solution provider in the Greater Maryland Region since 1969. They provide the businesses, government agencies, schools and universities, and manufacturing facilities with innovative and comprehensive solutions for a wide range of applications. Their products address the need for higher efficiency at lower operating costs. WBA has grown to become a trusted expert in the community, representing over fifteen industry-leading manufacturers and lending an experienced vision to every project.

“Ward-Boland continues its tradition of representing only the leading manufacturers in HVAC. For your humidification needs we now proudly represent Neptronic”, said Mark Kohr, Senior VP Sales from WBA. He added, “We believe this is a great addition to our product line that will allow us to continue to provide an array of industry-leading humidification solutions. Ultimately, adding Neptronic will help us continue to fulfill our mission of creating long-term value for our customers through a commitment to excellence.”

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 75% of its sales through an exclusive distribution network for the HVAC industry worldwide
