

Montreal, Canada | February 11th, 2020 – Here at Neptronic, we had a wonderful time participating at this year's AHR Expo in Orlando, Florida, where we showcased our latest products and innovations, including the new CMMB100/102 dual mini I/O boards, TSUB & TUUB universal wall-mount controllers, RPB BACnet router and the Make-up Air unit! This was our 39th year participating in the largest HVAC Expo in the world and we look forward to seeing all participants again next year, in Chicago!

AHR EXPO

About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters. Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft² (7,500 m²) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies and exports over 75% of its sales through an exclusive distribution network for the HVAC industry worldwide.
