## Making the effort during the COVID-19 crisis

**Montreal, Canada | April 28<sup>th</sup>, 2020** – As the current reality disrupts the way we normally interact among each other social distancing forces us to maximize the use of online platforms to help us virtually stay connected with our customers. Neptronic has been very busy presenting many webinars in the past weeks. We have been covering the importance of humidity for public health, among other topics.

On April 16<sup>th</sup>, our most recent agent, Gardiner Service Company, from Solon Ohio, organized a webinar with Neptronic on the importance of humidity during this pandemic and its impact on public health. Over 150 engineers, owners and contractors participated in this one-time presentation. This was part of a program of many webinars they have been organizing in order to keep regular contact with their customers.

“We are very excited to have the opportunity of working with such a proactive organization. In a very short time, Gardiner Service Company has shown an impressive level of leadership in their effort of exposing Neptronic as their new humidification line”, said Luis Melgares, Vice-president of Sales and Marketing. He added, “We are convinced that the results of their effort will prove for themselves in a very short period.”

Neptronic is always ready to help and support our agents in their effort of promoting our products. We would like to congratulate Gardiner Service Company for their time and effort during these challenging times and hope others will follow in their example.

### About Neptronic

Founded in 1976, Neptronic is a private corporation that designs, manufactures and distributes products for the HVAC industry. The Neptronic product line includes intelligent controllers, electronic actuators, actuated valves, humidifiers and electric duct heaters.

Products are designed and manufactured by over 200 dedicated employees in an 80,000 ft<sup>2</sup> (7,500 m<sup>2</sup>) state-of-the-art facility located in Montreal, Canada. Using a vertically integrated plant model, all R&D and manufacturing capabilities are located under one roof; from software and hardware development, to SMT circuit board assembly, to sheet metal fabrication, to product testing.

Neptronic is committed to research and development, provides innovative products and technologies
