SKVF – Evaporative Cooler

Montreal, Canada | July 12, 2021– Neptronic is pleased to announce the official launch of our very first cooling unit. The **SKVF Evaporative Cooler** is engineered to beat the heat in applications where high temperatures are unfavorable to occupants, production and material goods while also adding humidity to the space.

The SKVF uses energy-efficient and modulating fans to circulate outdoor fresh air or indoor recirculated air. It can be used in both humidification and cooling applications to decrease room temperature in an energy-efficient manner in greenhouses, paint booths, data centers, factories, and more.

Features

- Compact, quiet and stand-alone unit
- ECM fan with variable output
- Easy and low maintenance
- Configurable for minimal water usage
- Remote humidity and temperature control

About Neptronic

With innovation and devotion at its heart, Neptronic engineers, manufactures, and distributes reliable and long-lasting products for the HVAC industry since 1976. Our dedicated team of over 250 experts designs and manufactures all our products in Montreal, Canada, where our 9,000 m² (97,000 sq.ft.) facility stands proudly.

Neptronic's ever-growing commitment to research and development drives our constant creation of new, innovative and technological HVAC products adapted for various contexts.

With over 80% of our sales being exported, our exclusive distribution network works to provide comprehensive solutions to our customers around the world.
